

Designed for simplicity, the Microbiology Society's Publish and Read licence offers light-touch administration for librarians and a frictionless OA experience for authors.

Aiming for inclusivity, Publish and Read is a transformative vehicle enabling flexibility for all authors to publish their research regardless of individual access to funds.

Delivering compliance with funder and institutional OA policies.

Driving more OA.

“We believe [the Society] provide a good proposition for OA transformation which are costed fairly, allow unlimited OA publishing for an upfront fee and are not burdensome to administer.”

University of Birmingham, UK

One annual institutional fee
